

ODN with OpenJDK 8

OpenJDK is available for Debian 8 via backports. Thus if you wish to use OpenJDK 8, install ODN as described in [Installation and Upgrade Manual](#) and then:

1. Add jessie-backports repository to your apt configuration:

```
echo "deb http://ftp.de.debian.org/debian jessie-backports main" > /etc/apt/sources.list.d/jessie-backports.list
```

2. Update apt sources:

```
apt-get update
```

3. Install OpenJDK 8:

```
apt-get install -t jessie-backports openjdk-8-jre-headless ca-certificates-java
```

4. Configure OpenJDK 8 as default:

```
update-alternatives --config java
```

and enter the number for selection belonging to version 8
