

create a new catalog record for a dataset in catalog

I want to create a new catalog record for a dataset in catalog so that at least mandatory metadata about dataset are available in catalog.

Who can do this? (User role)

DataPublisher

Description

I want to create a new catalog record for a dataset in catalog so that at least mandatory metadata about dataset are available in catalog.

Preconditions

- no preconditions defined

Acceptance criteria

- DataPublisher clicks 'Add dataset' button to add new catalog record for dataset
 - available metadata fields are displayed
- DataPublisher fills in the required metadata fields about dataset (at least the mandatory fields)
- DataPublisher clicks 'Finish' button if satisfied
 - metadata is stored and new catalog record is created in catalog
